**DETAILED ACTION**

***Election/Restrictions***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

I. The embodiment wherein the customer provides an identification number and the system provides a prioritization score (claims 1-11, and 22-32).

II. The embodiment wherein the customer responds to a set of queries and the system develops a prioritization score based on said query (claims 12-21, and 33-42).

III. The embodiment wherein the computer generates a prioritization score based on info retrieved automatically by the computer (claims 43-55).

2. Upon election of species I, II or III, the Applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic).

A. Wherein the customer information comprises financial information describing the customer's likelihood to purchase.

B. Wherein the customer information includes a pre-determined prioritization score associated with likelihood to purchase.

3. Upon election of species A or B, the Applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic).

Art Unit: 3644

a. Wherein the customer inquiry is responded to based on the highest score only.

b. Wherein the customer inquiry is responded to based on a queue set up by a computed prioritization scores.

c. Wherein the customer inquiry is responded to based upon score and time received.

4. Upon election of species a, b, or c, the Applicant is further required under 35 U.S.C. 121 to elect one of the following disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable (currently, no claims are generic).

i. Wherein the customer information comprises whether the customer has a credit card.

ii. Wherein the customer information comprises whether the customer has a checking account.

5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement (e.g. I, A, a i), and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the

Art Unit: 3644

limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
